

Progress in Drug Research / Fortschritte der Arzneimittelforschung / Progrès des recherches pharmaceutiques

By JUCKER

Birkhäuser Jul 2013, 2013. Taschenbuch. Book Condition: Neu. 244x170x20 mm. Neuware - Volume 38 of 'Progress in Drug Research' contains four reviews and the various indexes which facilitate its use and establish the connection with the previous volumes. The articles in this volume deal with novel quinolones and their antibacterial properties; neuropeptides and their immunoregulatory role; the new generation of monoamine oxidase inhibitors and their potential use in Parkinson's disease; and with alternative approaches to the discovery of novel antipsychotic agents. These four reviews present important tools in the search for new and useful medicines. In the 32 years that 'Progress in Drug Research' has existed, the Editor has enjoyed the valuable help and advice of many colleagues. Readers, the authors of the reviews, and, last but not least, the reviewers have all contributed greatly to the success of the series. Although the comments received so far have generally been favorable, it is nevertheless necessary to analyze and to reassess the current position and the future direction of such a review series. 380 pp. Englisch.

Reviews

Here is the finest publication we have read right up until now. It is actually written in easy words instead of difficult to understand. It's been written in a remarkably easy way in fact it is only right after I finished reading this book in which basically changed me, modify the way I really believe.

-- **Prof. Vanessa Smitham V**

This publication is indeed gripping and interesting. It is really exciting through reading period of time. I am just happy to inform you that this is the very best publication I actually have gone through during my individual existence and could be the finest pdf for ever.

-- **Miss Lela VonRueden**
