RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Portland, OR : U. S. Dept. of Agriculture, Forest Service, Pacific Northwest Research Station, 2007 OCLC Number: (OCoLC)144810475 Subject: Marbled murrelet -- Monitoring -- Pacific States. Excerpt: . . . Regional Population Monitoring of the Marbled Murrelet: Field and Analytical Methods line (by using a trigonometric calculation to obtain the distance). Although estimates were found to be negatively biased, the direct estimate of perpendicular distance was more precise. Raphael and Laake (2000, available from the senior author on request) documented the full set of steps necessary to configure program DISTANCE for analysis of data to compute a detectability function using this design. Observer Methods We conducted a number of tests to determine whether to use one or two observers to record murrelet observations ([http: www. reo. gov monitoring murrelet pdf pnwatsea. pdf](http://www.reo.gov/monitoring/murrelet/pdf/pnwatsea.pdf), Evans Mack et al. 2002). We obtained more accurate results from two observers than from one observer, especially when bird density was high and in wind conditions that generated wind wavelets. Under these conditions, single observers missed a higher proportion of birds close to the line...
